SKILLS

Data & Programming

Python, SQL, Pandas, NumPy, R (in progress), Git, API REST

BI & Reporting

Power BI, DAX, Excel, Streamlit, Plotly, Data storytelling

Machine Learning & AI

Scikit-learn, XGBoost, Classification, Isolation Forest, LLM agents (RAG)

Data Engineering & Cloud

Azure (DP-900 in progress), ETL, DuckDB, SQLite

LANGUAGES

French	Native
English	Fluent (C1)
Arabic	Native
Russian	Intermediate
Dutch	Learning actively (B1)

CERTIFICATIONS

Data Science & AI
Le Wagon · 2025

Agile Management (advanced)
UNOW · certified MOOC

In progress
Azure DP-900 · Power BI · MySQL (Maven Analytics)

◆ PROFILE

Computer Science master's graduate (**UMONS, 2025, Data Science & AI**) and **Le Wagon bootcamp alumnus (400h+)**, after ten years teaching Python, SQL and databases. I build complete projects on real data, from raw files to a result people can use: **credit risk scoring, fraud detection**, Belgian railway punctuality, computer vision on football matches. Teaching taught me to explain results to people who do not work with data. Available immediately.

◆ DATA PROJECTS

Risk Scoring Pipeline · Financial Data — 2026

UCI Credit Default (30,000 clients) · Kaggle Fraud (284,000 transactions)

github.com/Proftg/spf-risk-scoring

- **Isolation Forest** scoring on 30,000 clients, default rate monotone by decile
- Fraud detection on **284,000 transactions**: AUC 0.945, lift x58 in flagged profiles
- Streamlit dashboard and **15 automated tests** (pytest)

Infrabel Open Data · Belgian Railway Punctuality — 2026

Infrabel Open Data API · 5 datasets, 27,343 rows

github.com/Proftg/infrabel-dashboard · blackspots-infrabel · railway-delay-ml

- **KPI dashboard** (Streamlit and Power BI) aligned with the Infrabel Performance Contract
- **Heat map** of the 500 most delayed stations (Folium)
- **Delay model** (XGBoost, Isolation Forest): I found and measured a data leak, AUC 0.76 to 0.79 once removed

Conversational Agent · Financial Data — 2026

30,000 scored clients · answers in French or English

github.com/Proftg/rag-finance-agent

- **ReAct architecture (LangGraph, ChromaDB, Groq)** with a Streamlit interface
- New answers are validated by a person before they can be reused

Football Video Analysis — 2026

YOLOv8 · ByteTrack · SigLIP

github.com/Proftg/football-ai

- Detects players, ball and pitch, tracks players and classifies teams (SigLIP, UMAP, KMeans)
- **2D radar view and match stats** (distances, speeds, possession) from real pitch positions

◆ PROFESSIONAL EXPERIENCE

Computer Science Teacher — 2016 to present · 10 years

Fédération Wallonie-Bruxelles · Mons

- Designed and taught **Python, SQL and database** courses to 200+ students per year
- Explained complex technical concepts to non-specialists: **the same skill as presenting results to decision makers**

Independent IT Consultant — 2014 to 2015

E-zzy · Belgium

- Requirements analysis, network architecture and IT infrastructure deployment for small businesses

◆ EDUCATION

Master in Computer Science, Data Science & AI track
UMONS, University of Mons · 2025

Data Science & Artificial Intelligence Bootcamp (400h+)
Le Wagon · 2025
